Juggling Balls

About: Homemade juggling balls are super simple to make and are a blast to play with. Not to mention they're great practicing hand-eye coordination!

What you'll need: Balloons, scissors, funnel or a piece of paper rolled up like a funnel, Lentils or split peas

Instructions:

1. Blow up a balloon half way. Keep it inflated for about 30 seconds.
2. Now deflate it.
3. Use a funnel or roll up a piece of paper so that it is bigger on one end and smaller on the other.
4. Put the smaller end of the funnel deep into the balloon.
5. Fill it up with Lentils so it is filled before the neck of the balloon
6. Cut the top off of the balloon
7. Take two more balloons and cut the top off
8. Stretch the first balloon over the filled balloon and cover the side that has the hole in it.
9. Cover the balloon with the third and last balloon.
